SUMMARY

I am enthusiastic about leveraging my skills and experience to contribute meaningfully to dynamic projects and initiatives, fostering innovation and driving positive impact. I possess a strong analytical mindset and excel in problem-solving and tackling complex challenges to derive actionable insights. My commitment to excellence, coupled with a passion for continuous learning, positions me as a valuable asset in diverse professional settings.

WORK EXPERIENCE

Research and Data Analytics Officer   Jan 2023 - Present
Equitable Health Access Initiative. Lagos, Nigeria.
- Transform routine reporting processes by implementing advanced analytics and visualization techniques, utilizing tools such as Spreadsheets, SQL, and Tableau to extract, analyze, and present data, resulting in more efficient and insightful reports.
- Spearheaded the curation and in-depth analysis of project-related content, enhancing the company's official website with compelling data-driven narratives. This initiative contributed valuable insights to major projects, including the Child Blindness project, Pfizer project, and TB-LON3 project.
- Took a proactive role in community development outreach for TB awareness, leveraging self-directed learning activities to effectively communicate TB symptoms to local communities.
- Innovatively design and implement data pipelines, streamlining the data entry process into the system. This enhancement significantly improved data analysis efficiency and accuracy.

Data Trainer   Jun 2023 – Present
Equitable Health Access Initiative. Lagos, Nigeria.
- Enhanced team capabilities by proficiently training interns in the practical application of data analysis techniques using Microsoft Excel and Google Sheets. This empowered interns to extract valuable insights from complex datasets, contributing to a more data-savvy and efficient workforce.
- Prioritized the importance of effective data visualization techniques, instilling interns with the skills to create compelling charts and graphs. This emphasis not only improved their ability to convey data-driven insights but also fostered a culture of visual storytelling within the team, enhancing overall communication and understanding of complex datasets.

Bancassurance Associate   Jan 2022- Aug 2022
First Bank of Nigeria Insurance (National Youth Service). Lagos, Nigeria.
- Provided comprehensive client support by addressing inquiries about financial plans and strategies, demonstrating strong communication skills and a deep understanding of financial products.
- Conducted in-depth analyses of investment products, leveraging insights to develop tailored financial strategies. This strategic approach not only enhanced client satisfaction but also contributed to the customization of financial solutions aligned with individual needs and goals.

Research Assistant   Jan 2020 – Jun 2021
International Institute of Tropical Agriculture (IITA). Ibadan, Nigeria.
- Applied advanced microscopy techniques to meticulously identify various nematode types and their eggs, showcasing precision and attention to detail.
- Conducted groundbreaking experiments by inoculating Root-Knot Nematodes on cucumber and tomato plants, contributing to valuable insights into plant pathology.
- Led in-vitro tests of aqueous leaf extracts on Root-Knot Nematodes eggs and juveniles, meticulously collecting data under varying concentrations and time periods.
- Analyzed the extensive dataset and translated findings into compelling visualizations using SSPS, facilitating easy interpretation and presentation. This approach not only demonstrated analytical prowess but also ensured the effective communication of complex scientific data.
